DETAILED ACTION

Reason For Allowance

1. Claims 1-8 are allowed.

2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, which include a display comprising liquid-repellency parts and repellency-lowered parts on the surface of the first substrate and the second substrate, wherein the insulating liquid is provided to the repellency-lowered parts of the first substrate and the second substrate as compartments.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kishi et al. (U.S. Patent 6,639,580 B1) is an electrophoretic display device and method for addressing display device in Figure 1 comprising of a transparent first substrate (item 1) and a second substrate (item 2) arranged with a predetermined gap therebetween, an insulating liquid (item 7) provided in the gap, charged particles (item 6) dispersed in the insulating liquid

Application/Control Number: 10/758,464

(7), and a first electrode (item 5) and a second electrode (item 4) arranged on either of the first substrate and the second substrate, wherein: the display comprises liquid-repellency parts (item 4) and repellency-lowered parts (item 3) on the surface of the first substrate, and the insulating liquid is provided to the repellency-lowered parts of the first substrate; however, Kishi et al. does not teach or suggest that the display comprises liquid-repellency parts and repellency-lowered parts on the surface of the first substrate and the second substrate, wherein the insulating liquid is provided to the repellency-lowered parts of the first substrate and the second substrate as compartments.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuyen Tra whose telephone number is (571) 272-2343. The examiner can normally be reached on Monday to Thursday from 8:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Epps, can be reached on (571) 272 - 2328. The fax number for this Group is (703) 872-9306.
